Forecast for Sunday 18 Oct 2020

Weather: Many ranges will be dry but an isolated light shower possible along western coastal ranges, and perhaps some patchy light rain developing in the south of the area from mid-afternoon onwards. The south will see low cloud through the day, although some sunny breaks possible north of Assynt in the morning.

Chance of cloud free mountain/hill tops above 800m: Little in the way of summit cloud expected in the north. Some cloud between 600 and 800 metres across Skye at times, this likely to clip the Cuillins. Some persistent low cloud is likely south of Inverness to Applecross, more especially in the afternoon.

Visibility: Rather hazy under cloud cover, but good in the north. Occasionally turning poor in the afternoon across the south.

Met Office Aberdeen Meteorologist's View
Icy conditions expected at height following showers on Saturday.

Forecast for Monday 19 Oct 2020
Weather: Cloudy with rain for much of the day, some of this be heavy in the southwest of the region. Far north of the area may see some drier interludes but these are unlikely to be prolonged.

Maximum wind: Easterly 30 mph

Chance of cloud free mountain/hill tops above 800m: Cloud down to 500 to 800 metres, extensive in the east but more broken along the west coast north of Skye.

Visibility: Rather hazy in rain.

Temperature: **Glens:** Plus 6 rising to 9 Celsius
At 800m: Plus 6 Celsius
Freezing level: Above summits
